LER 0564 Attribute Lacing Buttons
LER 0141 Bead Pattern Cards

Ask the children to make
up patterns of their own using
specific colors. They can then
challenge their peers to recreate
the patterns. Children will love
to try and trick their friends
with difficult patterns
and arrangements.

Plastic Beads

Teaching Guide

The development of visual motor skills is vital to success in many curriculum areas. Beads provide practice in: pre-reading skills, color and shape identification, patterning, and eye-hand coordination. Encourage students to work from left to right to strengthen their orientation for reading.

NOTE: This set contains laces which may pose a strangulation hazard to children under 3 years of age.

Patterns & Puzzles

Create a pattern and challenge students to copy it. Make sure that your patterns meet the skill levels of your students. Ask students to verbalize a description of the pattern and then to try and recreate the pattern in a drawing. You are reinforcing patterning concepts through three mediums; sight, sound, and touch.

Challenge students to create patterns from verbal instructions. Then string beads to show the correct arrangement. Verify your students' skills by asking them to display their strings of beads.

Sorting

Use the color beads to reinforce sorting skills. Ask students to sort the beads by shape or color, then to string them. Instruct students to place two blue spheres on a string. You've asked them to sort by quantity, color, and shape!

Counting Up

Sort and count the beads to develop addition and subtraction skills. Use the beads as counters to describe real-life story problems. Students can string and display their answers.
