Subject: Small Business Concerns

The below links are just a sample of the many websites and blogs which are forming against the CPSIA. These websites point out the devastating impact of the CPSIA on the viabilities of small businesses and the availability of cherished products. You should also note that many of these blogs and web entries are written by Moms, the people your law was supposedly going to help. If Moms are rising up in opposition to your safety law, isn't this a strong sign that something is SERIOUSLY WRONG???
