

## Write & Wipe

# Desk Mats

## Math Graphs

Graph easily with these ready to use, durable, Write-and-Wipe Desk Mats! The set includes 30 double-sided mats, enough for the whole classroom. The desk mats measure 11" X 17", allowing a large space for each graph with plenty of room to plot points or color bars. Write-and-Wipe Desk Mats are a perfect fit for any desk or table.

Graph paper is on one side of the mat which can be used to plot points or make X/Y coordinates. Use this side for any graph-related activity in the classroom. The graph paper on the reverse side of the mat includes lines for labeling two different variables. Use this side when working with bar graphs and lines graphs.

Use a dry-erase or wet-erase marker on these mats. When cleaning off the wet-erase marker, use a damp

cloth and do not saturate the mats with water. Using too much water will ruin the mats. When not in use, store in the sturdy box provided to ensure the mats will be intact year after year.

### Suggested Activities

- Provide a mat for each student during a math lesson. Have students follow along in their books or on the board while creating an appropriate graph for the lesson.
- Have students choose something to graph and poll the class. Then have them choose a type of graph to make, fill in the variables, and make a graph with the mats.
- Use the graph paper as a quick art project using different color dry-erase or wet-erase markers.

- Use the mat as an answer board. After going through a problem, have the students raise their mats so you can instantly see if they are on the right track.
- Use the mat to discuss bar graphs, line graphs, X/Y axis and coordinate graphs.
