

Contents:

- Game Board
- 4 Little Critter Game Pieces
- 2 Number Dice
- 1 Operation Die

Directions for game play:

Each player chooses a game piece and places it on start. Players roll a number die and the player with the highest number goes first.

The first player rolls all 3 dice and creates a number sentence by placing the **highest** number die **first**, the **operation** die **second**, and the **smallest** number die **last**.

The player then adds or subtracts the numbers, and moves ahead the sum or difference. For example, if a player rolls $3 + 2$, he/she moves ahead 5 spaces. If a player rolls a combination that equals 0 ($5 - 5 = 0$), he/she does not move. Then it is the next player's turn.

The first player to reach the finish space is the winner!
(Note: players do not need to roll the exact number to reach the finish space.)

Special spaces on the board:

"Evens" or "Odds": If a player lands on one of these spaces, he/she rolls one die. If a player rolls an "even" or "odd" number as indicated on the game board, he/she moves ahead that number of spaces. If an even/odd number is not rolled, the player must wait until his/her next turn and try again!

Number Space: If a player lands on a number space, he/she rolls the operation die. If the player rolls a +, he/she moves ahead the number indicated on the space. If the player rolls a -, he/she moves back that number.

"Short Cut": If a player lands on one of these spaces, he/she follows the arrow as indicated on the board.

"Endless Loop": All players enter the loop as the arrow on the board indicates. Players continue moving counterclockwise around the loop. If a player lands on the space marked "exit," he/she can exit the loop on his/her next turn.
