About the Author

Jan Goldberg is a certified, experienced instructor of grades K-9. In addition to teaching in traditional classrooms at the elementary school level, she has taught writing classes and workshops across the United States and serves on-staff at the University of Chicago. She has developed test materials for leading testing and publishing companies, and has written curriculum for both students and teachers. She is the author of more than 50 nonfiction books and 800 articles. Her work has been named to the New York Library's Best Books for The Teen Age (2000) and Voice of Youth Advocates' Nonfiction Honor List (2003).

Every teacher knows that each student is unique, any many of today's classrooms include struggling readers as well as accomplished readers. Research has proven that hands-on activities are highly successful in developing and assessing the reading levels of all students, regardless of their ability levels. Reading Rods® skill-specific line of manipulative products reinforces these hands-on methods. **Everyday Assessment with Reading Rods®** provides teachers' with a clear and reliable way to improve reading assessment through the use of hands-on manipulatives.

After setting the stage through a concise overview of reading instruction trends and research, this user-friendly book shows teachers how to assess students' reading progress simply and effectively with Reading Rods®. One hundred hands-on activities using Reading Rods® components are included.

Everyday Assessment with Reading Rods® offers activities aligned with each of the five areas of reading instruction defined by the National Reading Panel in its unparalleled study, *Put Reading First: Phonemic Awareness, Phonics, Fluency, Vocabulary, and Text Comprehension*.

These 100 activities can be put to use immediately in the classroom using the templates provided in addition, a helpful appendix including resources on reading instruction, educational trends, and research is included.

Everyday Assessment with Reading Rods® provides teachers with all the hands-on learning tools they need to assess students' reading skills with confidence, knowing that they are addressing each critical component of literacy acquisition.
