

# Double-Sided Magnetic Letters

Turn your whiteboard into an interactive alphabet demonstration set! This unique set includes 26 double-sided magnetic letters. Each magnet features a real-life photo on one side and the matching lowercase letter on the reverse. Engaging pieces are large enough for the whole class to see.

## **Suggested Uses:**

- Place several magnets, photo-side up, on the board and have students say the beginning letters aloud. Write the letters on the board. Turn the magnets over to see if they guessed correctly.

- Use the magnets to introduce the letter of the week.
- Place several magnets on the board and have students put them in alphabetical order, using pictures or letters.
- Spell simple words using the lowercase letters on the back of the magnets.
- Place several magnets, photo-side up, on the board and ask students to guess which letters the images begin with. Then, take away an image and have students guess which letter is missing.

Note: Store the magnets flat to prevent warping. If the magnets do curl, gently bend them back in the opposite direction to flatten, or rub them on the board and let them sit.
