Colors and Shapes Flash Cards

Suggested Activities:
Around the Room—Choose one flash card and ask children to look for objects in the room that are the same color. Now ask children to look for objects that are the same shape. Is there anything that matched both color and shape?
Ship Shape—There are eleven different shapes in this set. Have children point to each shape as you say the name out loud. Help children draw the shapes on a piece of paper. Leave plenty of room between shapes and ask children to draw something using each one. For example, draw a person using the circle for a head, or make the triangle into a spaceship.
Now You See It—Line five cards face up in a row. Give children time to study the cards. Ask children to close their eyes while you remove
