On your turn, turn over 4 number cards. Use 2, 3, or 4 of them in any combination of addition and/or subtraction to make your goal number. When you use 2 cards, place one marker on the train car with “2 Numbers” on it. That car is filled. When you use 3 cards, place one marker on the train car with “3 Numbers” on it, and so on.

Turn the cards facedown for the next player’s turn. Be the first to place a marker on each of your train cars and win! Challenge: Try to fill more than 1 car on 1 turn.
Directions:

Use 1-10 number cards and 12 markers. Spread the cards facedown on the table. Turn over 2 cards and add them for your goal number. Keep turning over cards until your goal number is between 8 and 20. Write down your goal number. The player with the highest goal number goes first.
